

ISIS - Crash #2375

qtie - segmentation fault when setting a registration template

2015-11-30 01:46 PM - Tammy Becker

Status:	Closed	
Priority:	Normal	
Assignee:	Marjorie Hahn	
Category:	Applications	
Target version:	3.4.13 (FY16 R3 2016-08-31 Aug)	
Impact:	No expected impact.	
		Software Version:
Description		
The crash occurs after selecting a control point or creating a new one under the qtie "tie point tool" and under "Options", when the user selects the "Registration: Set registration template"...qtie completely crashes with a segmentation fault.		
This is under isis3.4.10 and isis3.4.11 versions of isis		

History

- Status changed from In Progress to Resolved
- Impact updated

#8 - 2016-08-01 05:35 PM - Tammy Becker

WooHoo! A registration def file can now be loaded without a problem.

Test area: /work/users/tbecker/IsisTesting/QTie/M2375_DefFile/

Thank you!
